EEL

Energy Efficient Lowbay

The EEL – Energy Efficient Lowbay – incorporates the latest technology of the High Output T5 lamps and ballast, providing the switching versatility of fluorescent lighting that is not available with standard discharge lighting.

Features:-

- Energy Efficient with significant energy savings over discharge lighting
- Easy installation through specially designed mounting Pod
- Panel mounted mains connector socket
- Pre-wired connector plug
- Various lamp options
- Two ballasts enabling dual switching of lamps
- Immediate strike up, which is not possible with discharge lighting
- Suitable for occupancy and daylight control
- Pod mounting and plug-in connector allows easy removal enabling ground level maintenance
- Polished specula reflectors to enhance light output
- Option of easy to locate polycarbonate protection sheet
- Available with Integral Emergency Pack

Uses:-

- **Warehouses**
- **Factories**
- **Car Parks**
- **Retail**
- **Garages**

Environmentally friendly and economical
