- Flexible system

Applications

- Applications
- Schools
- Halls
- Churches
- Stairwells

Description

The decorative pendant range provides solutions for many applications due to its range of globe sizes and control gear options. Its clean lines and diffused light output give a unique ambience created only by this type of luminaire.

Construction

The system is based around the single pendant unit which is available in a range of sizes from 300mm to 450mm, each unit features a pair of spun steel clamping plates. The pendant is supplied with a monks cap globe cover and a ceiling plate.
