

Astrid HighLite XL

DRIVERLESS LED FLOODLIGHT RANGE

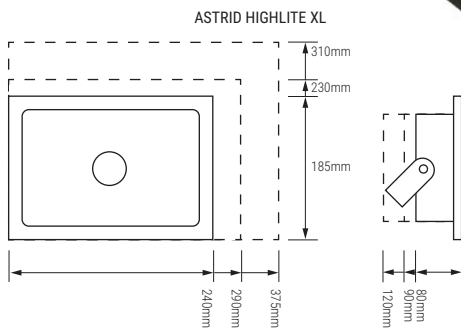

APPLICATIONS

- > Warehouses
- > Car Parks & Garages
- > Sign Lighting
- > Street
- > Factories & Retail
- > Apartments
- > Security

FEATURES

- > Energy Efficient
- > Reduces consumption up to 92%
- > Compatible with controls
- > IP rated
- > Life expectancy 50,000 - 70,000 hours
- > Immediate strike up
- > Meets most applications

40W 3200 lumen version

80W 6400 lumen version

DESCRIPTION

The LED solution for Energy Efficient Floodlighting and Industrial lighting requirements.

The Astrid HighLite is a versatile range of LED Lighting Systems specifically developed to meet most applications of Flood, Security and Building Accent Lighting. This comprehensive range is designed using the latest in Driverless LED technology, supplied under reference 'XL' for installations requiring a more robust heavy duty housing, with high output lighting, such as industrial

uses in loading bays, car parks etc. The unique feature of these high quality floodlights is that they are driverless and are ideal when considering maintenance at heights, as there are no components other than the LED chips that are driven directly on 230/240V. Energy efficiency with reduced maintenance is of prime importance and the Astrid HighLite Range offers multiples of options to replace discharge and halogen lighting. Unlike discharge lighting the LED light source

provides immediate illumination on striking and operates at full output in freezing environments. The Astrid HighLite XL Driverless LED Floodlight range is constructed with a low profile aluminium housing to IP65 and fitted with a glass lens to provide 120° light spread. It is available in a range of Wattages and supplied as Black or White.
