Description

The Firefly portable LED work light is an ideal companion that gives you light when you want it without the need of batteries or a power supply. The Firefly can be charged via mains using the USB socket offering hours of light to do your tasks.

You can also charge your phone and devices with the USB C-type output port.

The Firefly can fold down for ease of storage making it ideal to fit into extra small spaces.

The lamp has 3 output modes- High brightness, Low brightness and SOS flashing mode making the Firefly ideal for workshops, camping, fishing and other outdoor applications.
