

WISP

LED Solar Portable Light

Description

The Wisp is an ideal companion that gives you light when you want it without the need of batteries or a power supply. The Wisp can be charged either using the on-board Solar panel or via mains using the USB socket.

You can also charge your phone and devices with the USB C-type output port.

The Wisp can collapse down for ease of storage making it ideal to fit into extra small spaces.

The lamp has 3 output modes- High brightness, Low brightness and SOS flashing mode making the Wisp ideal for camping, fishing and other outdoor applications.

Model Code	Wattage	Lumens	Size (mm)
WISP	1W	80lm (High Mode) 40lm (Low Mode)	77x77x120 (Extended) 77x77x50 (Compressed)
